

Dresser Wayne® Fuel Dispensers and Technologies Now Available in Australia, New Zealand, and Oceania

Product launch event in Melbourne November 11-12, 2009

MELBOURNE, Australia (November 9, 2009) - Dresser Wayne (www.DresserWayne.com), a global leader in vehicle energy dispensing technologies, has received regulatory approvals for its leading fuel dispensers and will make them available for sale to retailers in Australia, New Zealand, and Oceania. Dresser Wayne, along with distributor Transponder Technologies (www.ttonline.com.au), will celebrate the launch with a special event in Melbourne, Australia, November 11-12.

“Built on a heritage of proven performance, our dispenser, payment, vapour recovery, and alternative fuels solutions help many of the world’s leading fuel retailers grow and improve profitability,” said Brett Walls, Dresser Wayne Asia Pacific Business Development Manager. “We are pleased to offer our technologies and capabilities in this strategic region.”

“Dresser Wayne products are known for high-reliability and customer-centric design. Fuel retailers in Australia and New Zealand will now be able to take advantage of these solutions,” said Liam Cahill, CEO of Transponder Technologies.

The flagship Global Star® V, a C-style dispenser, features a user-friendly interface, a patented hose management system, the highly-accurate Xflo™ meter, and alternative fuels compatibility. Global Star V supports multiple fuel grades and is available with up to eight hoses. The H-style Global Vista™ and compact Global Century® are also now available in this region.

Dresser Wayne dispensers’ proven durability and serviceability make them ideal for fuel retailers in the region. The innovative Xflo fuel meter makes it

possible for retailers to save thousands of dollars by virtually eliminating meter drift and reducing the frequency of recalibration. Higher flow rates mean more motorists can be served in less time. Independent testing has demonstrated no appreciable meter drift. Visit www.StopFuelLoss.com to access the Xflo meter fuel savings calculator and testing results.

Recent certifications received by Dresser Wayne include Australian / New Zealand Certification Scheme for explosion-protected electrical equipment (ANZEx) and National Measurement Institute (NMI) approvals for Weights and Measures standards.

Fuel retailers interested in learning more about this new Dresser Wayne product offering are welcome to attend the launch event at the Rydges on Swanston hotel in Melbourne, November 11 and 12. Contact Transponder Technologies at +61 (0) 8 8355 9599 or sales@ttonline.com.au for more information.

About Dresser, Inc.

Dresser, Inc. is a leader in providing highly engineered infrastructure products for the global energy industry. The company has leading positions in a broad portfolio of products including valves, actuators, meters, switches, regulators, piping products, natural gas-fueled engines, retail fuel dispensers and associated point of sale systems and air and gas handling equipment. Leading brand names within the Dresser portfolio include Dresser Wayne® retail fueling systems, Waukesha® natural gas-fired engines, Masoneilan® control valves, Mooney® regulators, Consolidated® pressure relief valves, and Roots® blowers and rotary gas meters. It has manufacturing and customer service facilities located strategically worldwide and a sales presence in more than 100 countries. www.Dresser.com.

About Dresser Wayne

Dresser Wayne, headquartered in Austin, Texas, is one of the largest business units of Dresser, Inc., and is an industry pioneer for the retail fueling industry. Among its innovations, Dresser Wayne was the first to introduce self-service consoles and fuel blending dispensers to service stations, in-pump card readers and cash acceptors, in-pump radio frequency identification payment systems and dispenser-mounted touch screen payment/communication

systems. In addition, Dresser Wayne designs and markets software systems that enable its retail fueling customers to manage the convenience store aspects of their business more efficiently, including inventory control, price book management, labor management, and site administration.
