Dresser Wayne Expands Fleet Solutions with 700 Series Pump for Small-Scale Fueling Applications

AUSTIN, TX (March 9, 2009) – Dresser Wayne, a global innovator of fuel dispensers and technologies, is adding a new fuel transfer pump to its robust lineup of fleet fueling innovations. The 700 series fleet pump line offers rugged capabilities for small fueling operations. Designed for use primarily with aboveground storage tanks of 2000 gallons or less, these direct-drive transfer pumps provide reliable fuel dispensing for small fleets, construction, farms, and parks and recreation facilities.

“The 700 series leverages Dresser Wayne’s leadership and quality in fleet fueling to meet the demand for compact yet durable pumps and meters for smaller fueling applications,” explains Tom Glahn, director of the Dresser Wayne Fleet Fueling Group.

Built with the same innovative technology that characterizes Dresser Wayne’s large fleet fueling solutions, the 700 series fleet pumps and meters deliver exceptional performance. The highly-engineered design delivers fast flow rates and accommodates a wide variety of fuel nozzles. Plus, they are easy to maintain, and the meter features an integrated vacuum breaker that meets anti-siphon regulations.

“From large fleet fueling operations to small pump and tank packages, Dresser Wayne dispensers satisfy a full range of application requirements, Glahn adds. Fleet fueling operations can rely on one proven provider.”

###

Dresser, Inc. is a leader in providing highly engineered infrastructure products for the global energy industry. The company has leading positions in a broad portfolio of products including valves, actuators, meters, switches, regulators, piping products, natural gas-fueled engines, retail fuel dispensers and associated retail point of sale systems and air and gas handling equipment. Leading brand names within the Dresser portfolio include Dresser Wayne® retail fueling systems, Waukesha® natural gas-fired engines, Masoneilan® control valves, Mooney® regulators, Consolidated® pressure relief valves, and Roots® blowers and rotary gas meters. It has manufacturing and customer service facilities located strategically worldwide and a sales presence in more than 100 countries. The company's website can be accessed at www.dresser.com.

About Dresser Wayne

Dresser Wayne, headquartered in Austin, Texas, is one of the largest business units of Dresser, Inc., and is an industry pioneer for the retail fueling industry. Among its innovations, Dresser Wayne was the first to introduce self-service consoles and fuel blending dispensers to service stations, in-pump card readers and cash acceptors, in-pump radio frequency identification payment systems and dispenser-mounted touch screen payment/communication systems. In addition, Dresser Wayne designs and markets software systems that enable its retail fueling customers to manage the convenience store aspects of their businesses more efficiently, including inventory control, price book management, labor management and site administration. The Dresser Wayne website is www.dresserwayne.com.
